

Norm,

Just wanted to thank you for your terrific insight and recommendations with our new internet marketing strategy.

I had always been confused and it was difficult to understand what the best internet strategy for us would be and most importantly how we can turn that into profits. Your recommendations were easy for me to understand and our clients are impressed with the results. We are already seeing the benefits of your recommendations.

Not sure I should mention this, but your internet marketing strategy was less expensive than alternatives we were considering with local Denver service providers. Thanks for being a true professional and making it easy. I highly recommend your internet marketing services and it was a pleasure working with you.
